Fantastic Opportunity for Enthusiastic Graduate Structural/Civil Engineer

Since the formation of Davidson Walsh, we have combined Civil and Structural Engineering expertise with design innovation and meticulous detailing to provide optimum solutions that realise our Client's aspirations. Whether for a multi-million pound development or a small scale residential scheme, we look to define the Client's goals and then work in collaboration with other members of the design team to turn these into reality. The resulting technical excellence brings Clients back to us repeatedly and continues to broaden our spectrum of work.

A Chartered Engineer leads every project and brings together a dedicated team with the relevant skills, experience and knowledge, either wholly from within the practice or with the addition of external specialists to provide an individually tailored service.

We currently have an exciting opportunity for a graduate engineer to join our friendly and supportive team.

You will be encouraged and supported through a professional development scheme in your progression to Chartership, as gaining this will play a key part in your contribution to the business and your continuing development.

Your duties will include:
