

Experienced AutoCAD Technician

Davidson Walsh is a highly experienced, well-established Structural and Civil Engineering consultancy based in Cheltenham and is looking for an experienced AutoCAD Technician as part of a continued growth strategy to service our large client base and increasing workload.

The team that you will be joining is experienced in a wide range of Civil and Structural Engineering including Residential, Commercial, Industrial, Public/Institutional Buildings, Energy Installation and Listed Building sectors. Our strong client base and range of projects provide a varied and fulfilling role in which you will be encouraged to share your expertise and ideas and in turn develop your own knowledge, skills and professional career.

With design innovation and attention to detail, we provide the most optimum solutions to ensure that the global design team and our professional colleagues deliver only the most efficient and sustainable design solutions. Therefore, this position would suit a driven, enthusiastic, intelligent, confident & ambitious computer literate person who has a good teamworking and collaborative approach to work.

What we need from you

- Strong AutoCAD skills with a minimum of 3 years of experience. Revit would be a great asset.
- Able to work efficiently using your own initiative, with good decision-making & problem-solving skills.
- Ensure the accuracy and completeness of project documentation and adhere to our standards and procedures.
- Staying up to date with the latest software updates and industry best practices to enable you to assist in the development of our systems and protocols.

- Ability to estimate time required to prepare and complete drawings and to work to agreed deadlines.
- The post would suit someone who has worked in similar role for a number of years, who can produce AutoCAD drawings with little supervision.
- Excellent communication skills and ability to work well within the team as well as collaborate with professional colleagues including Architects, Planning consultants etc; to coordinate designs, as well as hold discussions with clients where required.
- Follow an evidence-based approach to design and show good working procedures by referring to relevant design codes and technical documentation.
- Attend site meetings, carry out inspections and dimensional surveys when necessary, adhering to Health & Safety Guidelines.
- Uphold and promote the positive reputation of the company through attendance at networking events.
- Computer literate (Microsoft Word/Excel/PowerPoint/Outlook) and Project related administration tasks as required.

Hold a valid UK driving license.

Good to have

- Experience with Revit, Civil 3D, Tekla Structural Designer
- A qualification in Civil Engineering or relevant engineering course.
- Membership to ICE or IStructE
